

Franklin Mills Co.

Tambour Door Systems....fast, secure filing!

The perfect HIPAA solution! Franklin Mills Locking Tambour Door is a superior product in both durability and performance. It has been designed to be installed on new or existing Franklin Mills shelving as well as most other brands.

The sliding door recesses back into the housing unit for quick access to files - adds 9" to the overall height of the system.

A spring loaded mechanism and a handle conveniently located 32" from the floor makes for smooth, easy opening and closing of the door.

Our tambour door housing unit attaches to the top of the shelving unit. Included is a track and base for easy assembly to existing shelving. Our tambour doors can be keyed alike or differently. Each door includes a pair of keys.
